

**New York Collection – Beds**  
*Sergio Bicego, 2019*

**Introduction**

We have looked at our most beautiful projects from another perspective: that of sleep. We have respected the visual language and maintained the intelligent functions that distinguishes them. The New York beds exhibit their retro elegance with a contemporary soul.

**New York Air**

The New York Air bed follows the same line of the sofa collection exhibiting all its retro elegance mixed with a contemporary soul and timeless spirit. A bed of two identities and characterized by the hexagonal shape and quilted detailing of the headboard, New York Air rests on a sled base, available in various finishes.

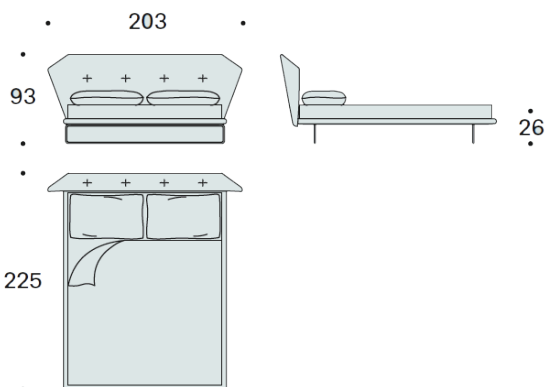

**New York Box**

The variation with a floor bed frame offers a fuller option and expresses the classic identity of the New York line, maintaining the iconic quilted headrest.
