

New York Suite – Sofa *Sergio Bicego – 2015*

The New York Suite collection designed by Sergio Bicego still retains a contemporary soul and timeless spirit. The quilted cushions hint at a retro elegance and a nostalgic atmosphere yet the overall design appears futuristic. At the same time, the metropolitan allure is heightened by the hexagonal shape of the frame resting on slim steel rod feet. New York Suite is soft and welcoming also in the smaller versions such as the maxi lounge chair and the 155cm sofa which seats two people comfortably and is particularly interesting for contract projects.

Materials

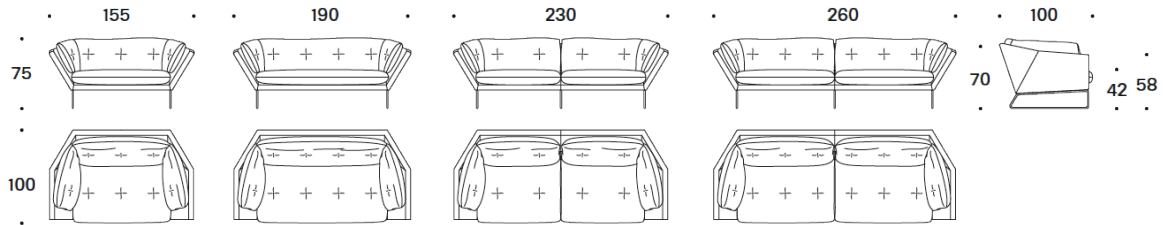

Frame in solid wood covered with differentiated density polyurethane foam and springing provided by elastic straps in polypropylene. The seat and back cushions are in polyester fibre with differentiated density polyurethane foam pad and covers in white 100% cotton fabric.

The upholstery is quilted with a special system which allows the covers to be removed. The feet are in 16 mm steel rod.
