

Shade of Venice – screen

Marco Zito, 2018

The Shade of Venice dividers, inspired by the Venetian islands and their local glow, are created with a magical colorful weave of nautical cords. From the white stone of Giudecca to the colors of the vegetables that grow in the garden patches of Venice's Sant'Erasmus, four variations were born: Murano, Burano, Giudecca and Sant'Erasmus. The light blue and green colors of Murano play in the threads of the divider's weave, whilst the bright tonalities and contrasts of the Burano design reflect the colorful houses of the island in orange and blue. The design plays with positive and negative space, creating a peek-a-boo effect subtly revealing the surroundings beyond. The Shade of Venice dividers allow for great flexibility and infinite styling possibilities, both indoor and outdoor.

Materials

Structure in outdoor coated wire drawn with HT polyester nautical ropes, diameter 4 mm
